

INSTRUCTIONS

Stencil Layout

1. Locate a section of the asphalt/concrete which is about 20 feet by 36 feet wide (6 x 11 meters).
2. Make sure the surface is clean. Sweep and wash if needed.
3. Unroll stencil section 1→2 at the top of your cleared area.
4. Anchor the stencil with masking tape to keep the wind from blowing it around.
5. Unroll stencil section 2 below and next to section 1→2 on the side indicated by the →2.

Be sure the stamped edges of the sections are aligned and the adjacent edges are close together.

6. Unroll the rest of the sections in order so that the final layout looks like the illustration.
7. Using a small brush (1/2" or 1 cm), dab paint into the holes with a paint color that has a lot of contrast with the surface to be painted.
8. Remove the stencil.
9. Connect the dots.
10. Paint the countries.

Painting the Map

1. Use 100% acrylic latex paint . . . see color chart (right) for approximate quantities.
2. Use six colors (five for the countries and a sixth for lakes and seas) as shown on the color coded map. A useful idea is to give each team of helpers a color and a copy of the color map so they can go to each of their countries and paint and don't have to ask "What's next?"
3. Helpful items: bristle brushes to paint countries, two rolls of 2" (5 cm.) wide masking tape to hold down the stencil, containers with water to wash brushes, rags, knee pads.

Color	*Approximate Quantities	
	U.S.	Metric
① Yellow	1/2 gallon	2 liters
② Pink	1/2 gallon	2 liters
③ Green	1 gallon	4 liters
④ Purple	1 gallon	4 liters
⑤ Orange	1/2 gallon	2 liters
⑥ Blue	1 quart	1 liter

* These quantities are recommended for very textured surfaces; smoother surfaces will use less paint.
